

Title: .NET Application Developer

Skills: .NET framework and development platform

Pay: Competitive Salary

Job Site: Los Altos, California

Job Description:

LCG Consulting is a R&D organization active in the energy sector. Situated at the center of Silicon Valley, LCG has a rich history of consulting activities and cutting edge model development to support our growing user base in the area of competitive analysis of power markets.

LCG has an immediate opening for a highly motivated .NET specialist for application development. The successful candidate should be knowledgeable of the .NET framework and will take a leadership role in the design, development and deployment of custom applications.

Responsibilities:

- Support current development activities by creating custom applications for clients and proposing and implementing refactoring techniques for existing applications (initial responsibilities).
- Participation (and leadership) in the end-to-end design and development of cutting-edge energy system simulation software (medium to long-term responsibilities).
- Interact productively with clients to understand requirements and develop specifications.
- Some travel may be required.

Key Requirements:

- 3+ years of .NET development in a highly professional environment.
- Proficient command of the .NET framework and development platform
- At ease with Agile practices including test driver development and continuous integration
- Reflexive use of best practices, including
  - Object Oriented design
  - Design Patterns
- Inquisitive and motivated
- Strong writing/verbal communication skills and customer service skills
- Independent working ability

Send resumes along with a cover letter indicating job title, earliest availability and expected salary range to [info@energyonline.com](mailto:info@energyonline.com). Additional information about LCG is available at our web-site [www.energyonline.com](http://www.energyonline.com). Local residents are preferred.
